HEMENSE LAN

Frontend Web Developer

Highly skilled frontend engineer with 3 years of experience working in fast paced organizations and freelancing. I excel in developing business solutions using React, Typescript, Node.js, and Go. I possess excellent communication skills, I am a critical thinker, and adept at collaborating with cross-functional teams to deliver projects on time and within budget.

WORK EXPERIENCE

Frontend Developer — Sept 2022 - Present
AFEX Commodities Exchange | Central Business District,, Abuja

- Led the redesign and development of the company's internal inventory and operations management system with a full migration from Django to React. The system is responsible for the orchestration of the company's day-to-day operations. I improved the speed of the application and user experience
- Built the Fixed Income and Derivatives portion of the trading platform catering for primary and secondary markets within the agricultural sector of the Nigerian economy.
- Built a self-service data visualization tool to cater for business needs with an integration with the company's natural language query processor, thereby reducing the data requests pile up..
- Increased developer test strengths and design pattern adoptions by organizing regular team conversations and sessions on the need for the adoption of good architecture and design patterns. I also participated in Peer Programming sessions and code reviews

Web Engineer — Oct 2021 - Sept 2022
Bluecaller Integrated Services | Utako Abuja

- I worked on the recommendation engine for the backend service of the organization. This service sought to bring users and artisans closer.
- I led a small team of 3 for an external client looking to transition shopping online. We developed novel solutions for cataloging, inventory management and order distribution
- I worked with a team to develop the blueprint for the brand and worked on developing the homepage for the organization.

Freelance — Jan 2020 - Present
N/A

- I worked on a file-sharing application for an organization looking to replace manual minuting and logging of documents shared within the organization
- I built the user signup landing page, admin panel dashboard and a mobile app for a real estate agency seeking to revolutionize the purchase and renting of apartments. I worked as the sole engineer on the project, delivering on all milestones
- I worked with a microfinance bank to convert their simple HTML theme to a fully customisable wordpress powered theme.
- I worked with a lottery organization looking to establish new roots in Nigeria and offer lottery services via the internet by building the user facing website and CMS for their draw history.
